

LEXUS

EPISODE SEWEM

EPISODE SEVEN CONCEPT

The starting point of the LS was to refine every aspect of 'driving performance, ride, and interior comfort' encoded in the original LS DNA, to give fresh expression and nuance to exceptional Lexus quietness, comfort and peace of mind. Then project it into the future through the adoption of innovative technologies that advance the HMI (human-machine interface) between driver and car to deliver exhilarating, confident driving.

These qualities are given emotional expression through an artistic approach to design that shapes the dynamic silhouette. It is deepened by Takumi craftsmanship which captures the ethereal qualities of moonlight on waves in the unique 'Haku & Nishijin' finishes in the cabin¹ (in Sports Luxury models only), and enjoyed in the everchanging moonlit-inspired light and shadow of the sophisticated Lustre Shadow exterior finish.

DISCOVER MORE ABOUT THE LS

EXTERIOR

The LS exudes chic sophistication at first ight, fusing sensual beauty with a low centre of gravity to shape a distinctive, confident presence. The beautiful form seamlessly integrates advanced functionality in the flowing lines of the grille and headlamps, highlighted by the ever-changing expression of the extraordinary Lustre Shadow finish.¹

DISCOVER MORE ABOUT THE LS

INTERIOR

A refined expression of contemporary luxury, the interior combines a cockpit designed to support simple operation and focused concentration for relaxed confident driving, with sublime comfort for deep relaxation. The subtle Japanese aesthetic and spirit of hospitality of Takumi craftsmanship enrich the inviting and dignified cabin environment.

DISCOVER MORE ABOUT THE LS

Multi material body

To achieve high body rigidity, light weight and excellent safety performance, required optimising the layout and use of hot-stamp, high-tensile steel for major body components such as the rockers, pillars and roof. To lower the centre of gravity and moment of inertia, aluminum was used for the body framework located further from the vehicle's centre of gravity, hood, boot, fenders, doors and suspension towers, endowing the body with excellent turning characteristics.

FR (Front engine, Rear wheel drive) platform

The LS takes advantage of the FR platform that Lexus refined for the LC to optimise front-to-rear weight distribution and the moment of inertia. The result is natural, smooth vehicle dynamics when cornering, accelerating and decelerating. The adoption of a low driving position and a layout that keeps the driver's hip point and the vehicle's centre of gravity close together minimises the distance between the driver and the axis of rotation, heightening the driver's feeling of oneness with the car. In this way, the packaging meticulously refines the inertia characteristics to deliver excellent response along with smooth, stable changes in posture during the sequence of movements involved in cornering.

Suspension

To realise high-quality driving and ride comfort befitting the Lexus flagship, the AVS (Adaptive Variable Suspension) damping force, stabiliser spring rate, and vertical spring of the wheels were fine-tuned to effectively suppress shock and vibration, providing high-quality ride comfort and exceptional guietness, as well as realising excellent steering response and stable vehicle posture.

VDIM (With integrated active steering control) + LDH

VDIM (Vehicle Dynamic Integrated Management) integrates control of engine, braking, steering and other functionality, including the EPS (Electric Power Steering) and LDH (Lexus Dynamic Handling system) which controls the steering angle of the front and rear wheels, as a single system, to provide a high level of active safety together with driving pleasure. $\ensuremath{\mathsf{LDH}}$ optimises the steering angle of all four wheels based on factors such as vehicle speed and steering inputs, to realise ideal vehicle dynamics for the driver's operation. The result is excellent vehicle stability during highspeed driving and nimble steering response in midspeed driving on surfaces such as mountain roads.

Drive mode select

Drive mode select provides integrated control of multiple systems to let you tune performance to suit your driving style. You can select and change between five modes: Normal, Eco, Comfort, Sport S and Sport S+ Modes. In addition, Custom Mode enables drivers to set their preferred settings for the powertrain, chassis and air conditioning.

3.5-litre V6 twin turbocharged engine (V35A-FTS)

This advanced powerplant combines powerful exhilarating acceleration generated by the flat torque characteristics of twin turbochargers, with quiet operation befitting the Lexus flagship. An array of advanced engine technologies including high-speed combustion and straight intake ports contribute to outstanding thermal efficiency, optimising both engine performance and fuel efficiency. The twin turbochargers provide high turbo boost even at low engine speeds, optimising torque while reducing fuel consumption.

3.5-litre V6 engine (8GR-FXS)

The hybrid system's V6 engine integrates advanced technologies that include Dual VVT-i and D-4S fuel injection system to generate a powerful driving experience. Analysis of big data on 'everyday acceleration' inspired fine-tuning of drive force control to enhance response and power output, delivering a quick boost in torque even when the accelerator is pressed less than half way, for smooth quiet acceleration enjoyed most often in daily driving conditions.

Multi Stage Hybrid System

The Multi Stage Hybrid System's 10-speed shift control optimises the hybrid system's characteristics to provide exceptional driving performance, with a direct and continuous acceleration feel that matches the increase in engine RPMs, together with excellent shifting rhythm. Increasing battery assist

during acceleration at often-used speeds experienced in city driving significantly enhances smooth start-up acceleration. At the same time, lower engine RPMs during start-up acceleration enhance quiet operation.

ANC (Active Noise Control) and Acceleration Sound Control (ASC) were fine-tuned to enhance the flagship-level quietness in the cabin, and at the same time enliven driving enjoyment. ANC suppresses engine boom at a wide range of engine speeds, while ESE tunes the sound of engine acceleration and deceleration to provide a powerful and linear sporty engine note.

DISCOVER MORE ABOUT THE LS

It is in the pleasurable discovery of the details blending superb functionality with exquisite beauty that you come to appreciate the special values Lexus hospitality provides. The character lines of the bold by touchscreen displays that provide intuitive control of the audio, silhouette enlivened by the ever-changing beauty of the Lustre Shadow navigation, climate control and other systems, to put personalisation finish¹, seamlessly flow into the slim headlamp unit that integrates 3-eye of a comfortable environment at your fingertips. Bi-Beam LED headlamps, innovative BladeScan AHS headlamps and the hospitality illumination of the DRL (Daytime Running Lamps).

It is enjoyed in the refined comfort of the seats, from deep stitch points to the use of low-resilience urethane in the seat pads. It is heightened

Rear combination lamps

harmonious form, heightened by the use of Piano

turn signal lamps illuminate in a sharp, well-defined

into the design contribute to excellent handling stability. All lamps, including on the boot, use LEDs.

Headlamps

A slim 3-projector lamp unit above and innovative BladeScan AHS (Adaptive High-beam System) headlamps below help provide excellent nighttime visibility for reliable, stress-free driving. The BladeScan system helps to dramatically enhance visibility at night, providing excellent visibility with a broad natural illumination range in high beam, to help support early recognition of pedestrians and road signs. The L-shaped LED DRL (Daytime Running Lamps) in the middle provide fade-in and fade-out 'omotenashi' illumination after the doors are unlocked and locked.

Door mirrors

The curvature of the mirror was optimisesd to enhance rear visibility in a compact size. Sculpting the inside of the mirror visor gives it a sharp shape, and creates more space between the mirror and front pillar, enhancing aerodynamic performance and reducing

Hands-free power boot

Even if both hands are full, when carrying the Electronic Key you can open and close the boot automatically by moving your foot under the rear bumper.

Moonroof

An outer sliding mechanism slides the glass above the roof to create a spacious open feeling.

The LS's refined packaging realises both a beautiful silhouette and ample luggage capacity.

DISCOVER MORE ABOUT THE LS

¹Lustre Shadow paint is an optional extra at additional cost. Overseas model shown. Australian specifications & features may differ. See your Lexus dealer for details.

22-way power rear seats and power ottoman (Sports Luxury models)¹

The power rear seats use motors and a pneumatic system that inflates and deflates air bladders to make fine-grained adjustments to every aspect of the seats. The rear seat behind the front passenger's seat has a power ottoman that provides generous support to the lower legs so the occupant can relax in refined comfort. In addition, three position presets allow the occupant to choose their preferred posture. 'Business' is the normal position. 'Entertain' reclines the seatback to a relaxing angle and positions the front passenger's seat for optimal viewing of the rear seat display. 'Relax' moves the front passenger's seat to the forward-most position and deeply reclines the rear seatback to optimise the rear seat space.

Rear multi-operation panel (Sports Luxury models)¹

The multi-operation panel display inset in the rear center armrest puts intuitive control of the audio, air-conditioning, seat adjustments and relaxation functions, sunshades and lighting at rear passengers' fingertips. An intuitive graphic interface that groups frequently used functions enhances easy operation.

Rear seat entertainment system (Sports Luxury models)¹

The rear seat entertainment system includes 11.6-inch displays that automatically adjust with the seat position to maintain an excellent angle for easy viewing, a Blu-ray Disc player, SD card slot, and an HDMI jack that enables the connection of a computer or other devices. Rear seat passengers can also enjoy videos, music and other media stored on mobile devices using Miracast or DLNA (Digital Living Network Alliance).

Mark Levinson®3 QLI Reference Surround Sound System

Since 1972, Mark Levinson has been dedicated to uncompromising audio fidelity as the audio reference standard. The LS's 16-channel 3D surround sound system drives 23 speakers. The 7 Unity speakers, ceiling speakers and QLI (Quantum Logic Immersion) surround technology fill the cabin with uniform sound quality, enveloping the listener in natural realistic sound with the precise positioning of a live sound stage, excellent separation and dynamic reproduction of sound sources.

21MM EMVN Multimedia System Touch Display

The 12.3-inch 21MM EMVN Multimedia System supports intuitive control of the navigation, audio and other systems by directly touching the screen like a smartphone, while maintaining a forward line of sight and driving posture. It is Wireless Apple CarPlay® and Wired Android Auto^{TM2} compatible for easy interaction with supported Apps.

Heater and ventilation switches/console box

Switches for the seat heaters, heated steering wheel, seat ventilation and rear sunshade are integrated into the upper console, enabling easy operation while maintaining a relaxed driving posture. Integrated AUTO indicators illuminate when AUTO functions are activated, for quick recognition of operational status. The convex shape of the heater switches enables easy, intuitive operation. The concave shape of the centre console box lid lets you store a smartphone inside without opening the lid, enhancing convenience. The depth of the storage space was carefully designed for both smooth shift lever operation and easy access to the smartphone.

Cool box (LS 500 Sports Luxury models)⁴

Air chilled by the rear cooler in the trunk space circulates through the cool box to keep items cool. Cool air vents allow the airflow to be switched on and off as required.

The rear window sunshade covers the entire window on both sides with no gaps. Operation of the rear guarter window sunshades is linked with the rear door window sunshades to provide comfort and privacy in the rear seats.

DISCOVER MORE ABOUT THE LS

¹Available on Sports Luxury models only. ²Requires compatible device, USB connection, mobile data, network reception & GPS signal. Mobile usage at user's cost. Apps subject to change. For details see lexus.com.au/connectivity. All images indicative only. Functionality varies depending on device. CarPlay[®] is a trademark of Apple, Inc. registered in the U.S. and other countries. Android Auto[™] is a trademark of Google LLC.

³Product & company names are trademarks of their respective owners. ⁴Available on LS 500 Sports Luxury models only. ⁵Rear Door and Rear Quarter Window Power Sunshades available on Sports Luxury models only. Rear Window Power Sunshades available on all models.

Overseas model shown. Australian specifications & features may differ. See your Lexus dealer for details.

28-way power front seats

The power seats combine motors and a pneumatic system to allow fine-grained adjustment of the seat to support every part of the body. Optimising support for different physiques to provide a feeling of unity with the car, the shoulder, hip and cushion side support contribute to stable body positioning during braking and cornering. Frequently used functions such as slide and recline, together with headrest up and down, are controlled using switches located on the side of the seats. Adjustment of both seats can be fine-tuned using the 21MM EMVN Multimedia System display. The driver also has independent control of the front passenger seat to adjust the seat for the comfort of rear seat passengers.

Front refresh seats (Sports Luxury models)¹

Air bladders integrated into the seatback and seat cushion are inflated to apply pressure from the occupant's back to the thighs, contributing to a feeling of relaxation. Programs can be selected for the entire body as well as particular areas (Upper Body, Lower Body and Lumbar).

Lexus Climate Concierge (Sports Luxury models)¹

Lexus Climate Concierge coordinates with the 4-zone independent temperature control to automatically control the auto air conditioner with the seat heaters, seat ventilation and steering wheel heater to provide optimal comfort for each occupant. The body surface temperature of occupants is detected by IR (Infrared Rays) matrix sensors to quickly provide the optimal level of comfort for all occupants. It also detects sunlight in the early morning and at sunset and controls the vehicle's climate control system to maintain comfort.

Easy Access Buckles (Front seats - Sports Luxury models)¹ To make the front seatbelts easy to use, the seatbelt buckle lifts

up when the door is opened and then moves back down once the seatbelt is fastened.

Electronically controlled air suspension (With access mode)

In addition to the vehicle height adjustment function which can be switched between Normal and High settings, access mode automatically raises the vehicle to make ingress and egress easy.

Power easy access system

The front seats feature auto slide-away and return functions, together with auto lift-up function (Driver's seat only) and cushion side-away function. For easy access, auto lift-up raises the seat lifter when the driver gets out and then returns it to the original seat position when the driver gets in. Cushion side-away opens the outboard side cushion supports to reduce the pressure on the thighs while getting in and out.

DISCOVER MORE ABOUT THE LS

¹Available on Sports Luxury models only. Overseas model shown. Australian specifications & features may differ. See your Lexus dealer for details.

Pre-Collision System with Pedestrian Alert¹

If the system determines a collision with a pedestrian in front of the vehicle is possible, Pedestrian Alert is designed to help the driver intuitively recognise the hazard by displaying an animated warning indicating the direction in which the pedestrian is present in the large colour head-up display.

Pre-Collision System with Active Steering Assist¹

When the millimeter-wave radar and stereo camera sensors detect a pedestrian or a continuous obstacle such as a guardrail in the vehicle's lane, and determine that a collision is likely and cannot be avoided by braking control with pre-collision braking only, but could be avoided with steering control, the Pre-Collision System is designed to augment the display warnings and braking control by activating Active Steering Assist to automatically control steering to help avoid a collision or mitigate the impact force.

FCTA (Front Cross Traffic Alert)¹

If the system detects a vehicle approaching from the front left or right when entering an intersection, it is designed to attract the driver's attention with an animated warning in the large colour head-up display showing the direction the vehicle is approaching from. If the driver continues to proceed despite the approaching vehicle, it will further prompt the driver with a buzzer and warnings on the display. This system also works in conjunction with the Panoramic View Monitor on the 12.3-inch 21MM EMVN Multimedia touch display.

LCA (Lane Change Assist)¹

While driving on highways and automobile-only roads with LTA (Lane Tracing Assist) activated, LCA is designed to support operations to change lanes, including steering, acceleration and deceleration, and monitoring vehicles in the target lane. LCA uses driver activation of the turn signal lamp as the cue to engage lane change support. After the lane change is completed, the turn signal lamp automatically turns off.

DISCOVER MORE ABOUT THE LS

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely.

LEXUS SAFETY SYSTEM +

Pre-Collision System¹

When the millimeter-wave radar and monocular camera sensors detect a vehicle ahead, a pedestrian during the day or at night, or a cyclist during the day and determine that a collision is likely, the Pre-Collision System is designed to alert the driver and activates pre-collision brake assist when the driver depresses the brake pedal. If the driver cannot depress the brake pedal, it activates the pre-collision brake to help avoid a collision or mitigate the impact force.

LTA (Lane Tracing Assist)¹

When Lane Tracing Assist is activated, it is designed to alert the driver of possible lane or road deviations and helps assist steering to avoid them. In addition, while driving on highways and automobile-only roads with Dynamic Radar Cruise Control (with full speed range) activated, it is designed to assist steering to help keep the vehicle in the lane.

All Speed Active Cruise Control¹

In addition to maintaining a constant speed, All Speed Active Cruise Control is designed to use the millimeter-wave radar and monocular camera sensors to detect a vehicle driving ahead and maintain an appropriate distance between vehicles.

RSA (Road Sign Assist - (Speed Signs Only)¹

To help support safe driving, RSA is designed to use the monocular camera sensor to detect speed limit signs and displays them on the multi-information display. In the event the driver exceeds the detected speed limit, RSA provides a visual notification.

AHS (Adaptive High-beam System)¹

In the BladeScan AHS, LED light is projected onto a plate rotating at high speed called a 'blade mirror,' with the reflected light passing rapidly through a lens to illuminate the forward direction. The LEDs switch on and off with optimal timing to enable fine control of light distribution, enhancing the range of illumination while blocking a small area in front of the car. This enables the BladeScan system to provide a broad field of high-beam illumination with natural light distribution to enhance the visibility of road shoulders and other more distant areas, supporting early driver recognition of pedestrians and road signs without dazzling the drivers of oncoming or preceding vehicles.

Blind Spot Monitor System¹

When the quasi-millimeter-wave radars in the rear bumper detect vehicles in adjacent lanes that aren't visible in the door mirrors, the system is designed to activate an LED warning indicator in the relevant door mirror the moment a vehicle enters this blind spot.

PKSA (Parking Support Alert)¹

PKSA detects stationary objects such as walls in the direction of travel, as well as vehicles and pedestrians approaching from behind while reversing, and is designed to alert the driver on the display and with a buzzer in the event that a collision is determined to be likely.

DISCOVER MORE ABOUT THE LS

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely.

Overseas model shown. Australian specifications & features may differ.

See your Lexus dealer for details.

Large colour head-up display

The system helps the driver intuitively understand warnings and take action to avoid potential hazards with animations and information projected on the large 24-inch (600×150mm) display. The screen is divided into different areas to effectively bring information to the driver's attention including cautions and warnings, driving support, road speed signs, vehicle speed, navigation and other information.

When the rear seat is unoccupied, it automatically reclines in tandem with shift operation. If the headrest is raised, it also lowers to provide a wide field of view in the interior mirror.

SRS (Supplemental Restraint System) airbags

for rear-seat passengers.

Digital Rear-view Mirror

The Digital Rear-view Mirror can be switched from optical to Digital Rear-view Mirror mode at a touch of a switch in the bottom of the mirror. In Digital Rear-view Mirror mode, the mirror helps assist safe driving by showing high-resolution, real-time images from the

backup camera integrated in the rear licence plate garnish, to provide

a wider field of view than optical mode, unobstructed by headrests,

luggage or passengers' heads. It also helps enhance rearward

visibility when the rear sunshades are in use to provide privacy

The LS features dual-stage SRS airbags (Front seats), SRS knee airbags (Front seats), SRS side airbags (Front and outboard rear seats) and SRS curtain shield airbags (Front and rear seats). SRS seat cushion airbags (Outboard rear seats) are also available for the power rear seats in Sports Luxury models.

The Lexus LS includes 3 years complimentary access to Lexus Connected agent who can direct emergency service providers to the vehicle's location

For details, visit https://www.lexus.com.au/ connectivity/lexus-connected-services-faq.

Panoramic View Monitor

Video that provides the driver with a bird's-eye view of the vehicle on the 12.3-inch 21MM EMVN Multimedia touch display in real time helps the driver to check conditions around the vehicle that are difficult to see. Side Clearance View: Helps the driver to check safe clearance to the side of the vehicle. Cornering View: Helps the driver to check clearance when turning left or right on a narrow road. When the Side Clearance View is active, the Cornering View is automatically displayed in response to steering operation.

Lexus Connected Services¹

Services, a new feature offering an advanced suite of three smart technologies designed for simplicity, safety and convenience. Firstly, (SOS) Emergency Call² is designed to instantly connect the driver to a trained if required. Secondly, Automatic Collision Notification³, where the vehicle's built-in sensors notify the Emergency Call Centre automatically in the event of the vehicle detecting a collision, even if the driver is unable to place the call themselves. And finally, Stolen Vehicle Tracking⁴, a feature making it possible to potentially locate the vehicle if stolen, in coordination with the Emergency Call Centre and the police.

F SPORT spindle grille and side grilles (Mesh type)

The exclusive spindle and side grilles inherit the F SPORT vertical pattern in a meticulous design that combines small L-shaped pieces. The jet-black, the exclusive colour of the 20-inch wheels. chrome-plated garnish on the side grilles wraps

around to the side, accentuating the wide, low stance and aggressive presence. It is reinforced by

Applying expertise gained in motorsports development, the seats incorporate protruding shoulder supports finished with Ultrasuede, a material with high friction resistance, to effectively hold the occupant. To enhance ride comfort, the front seats feature a deep-hung cover construction and a redesigned seat pad. The perforated section of the seats features the same L-shaped pattern as the spindle grille.

The F SPORT uses different tyre sizes on the front and rear to provide exceptional handling stability and boost rear tyre grip. The design of the exclusive F SPORT wheels inherits the DNA of the LC, evoking sports driving performance. They are finished in black sputtered coating with a black centre ornament, complementing the jet-black garnish of the lower body.

F SPORT TFT (Thin Film Transistor) LCD meter

The exclusive F SPORT meter evolved from the LFA's sliding meter ring. The advanced interface uses motion graphics that combine high visibility with beauty to display a range of functions that instantly communicate important information according to its priority.

VDIM (With integrated active steering control) + LDH (With active stabilisers)¹

VDIM and LDH help to optimise control of six types integrated control extends to the active stabilisers of vehicle movement, longitudinal, vertical, lateral, yaw, roll and pitch, by controlling vertical motion using active stabilisers. In normal driving conditions, integrated control of the active stabilisers and LDH suppresses yaw and roll, maintaining intuitive vehicle response, natural roll posture, and a stable posture across a wide range of speeds. At the limits, the

and other systems to help assist confident and comfortable driving. In Sport S+ Mode, the system delivers pleasant vehicle response, confidenceinspiring vehicle posture and a comfortable ride. In Comfort Mode, it enhances ride comfort in the

F SPORT brakes

Exclusive F SPORT brakes featuring the Lexus logo consistently deliver stable braking performance to enable aggressive sporty driving. The combination of opposed 6-piston monoblock aluminium calipers on the front, opposed 4-piston monoblock aluminium calipers on the rear, and high-friction brake pads contributes to high rigidity and excellent fade resistance. Large, 2-piece disc rotors on the front provide stable braking while limiting thermal deformation, and contribute to reducing unsprung weight.

With active stabilisers

Without active stabilisers

Control of vehicle posture in response

to steering inputs

Integrated control of LDH and the active stabilisers (F Sport models)¹ suppresses roll during cornering and lane changes in high-speed driving. In addition, the system controls vehicle movement in the roll direction caused by road inputs to deliver stable vehicle posture and a comfortable ride.

¹Available on LS 500 F Sport models only.

LEXUS OWNERSHIP SOLUTIONS

Lexus Ownership Solutions allows you to determine your finance costs and know the Guaranteed Future Value $(GFV)^+$ of your vehicle from the outset. It offers you choice, control and certainty. In short, everything you'd expect from Lexus.

How does Lexus Ownership Solutions work?

- · You choose the deposit that best fits your needs.
- You choose your term, ranging from 1 4 years.
- You decide on the estimated kilometres you think the vehicle will have travelled
 at the end of the term (the End Odometer). The End Odometer will also include
 any kilometres already on the vehicle.
- Lexus Financial Services (LFS) then determines the GFV+ of your vehicle and calculates your monthly repayments with a final payment equal to the GFV. The GFV is the minimum value of your Lexus at the end of your finance contract. So, if you choose to return your Lexus at the end of the term, LFS will pay you the GFV which will be put towards the remaining balance owing on your account (subject to fair wear and tear conditions and agreed kilometres being met).

The end of the term? Simply replace, retain or return.

At the end of your term you can choose to:

- Replace or sell your Lexus using the trade-in value or sale price to pay the remaining balance of your account.
- Retain your Lexus and simply pay the remaining balance of your account (including final payment).
- Alternatively, return your Lexus and, subject to fair wear and tear conditions and the agreed kilometres being met, we'll put the GFV towards the remaining balance on your account.

Choosing your deposit - what is best for you?

With the flexibility of Lexus Ownership Solutions, you can choose the deposit that best fits your current needs.

- If, for example, you have funds tied up in other investments, you can choose to finance your new Lexus with a zero deposit.^{††}
- Alternatively, by using a larger deposit, you can lower your monthly repayments.
- Or, compared to other finance options over a similar term with no GFV or equivalent balloon final payment, Lexus Ownership Solutions can provide lower monthly repayments.**

Want more certainty?

With Lexus Ownership Solutions, you've got the reassurance that at the end of the term (subject to fair wear and tear and agreed kilometres being met), you will know your GFV+, the minimum value of your Lexus from the outset, as determined by LFS.

What happens in the case of the unexpected?

If your vehicle incurs damage and does not meet the Fair Wear and Tear guidelines, LFS will give you the opportunity to have your vehicle repaired. Otherwise, LFS can organise the repairs and deduct the cost from your GFV. This adjusted GFV will then be the price that LFS will offer you if you return the vehicle at the end of your term. Of course, if you retain the vehicle, the condition doesn't matter, however, if you replace it or sell it privately, the condition will obviously impact your sale price.

So what does your accountant think?

Naturally, we think Lexus Ownership Solutions is an excellent, innovative way to put you in control of buying a new Lexus. That said, we suggest you seek independent advice to ensure Lexus Ownership Solutions is right for you.

Wouldn't it be great if Lexus Ownership Solutions was just the beginning?

Lexus' innovations and commitment to customer service extend well beyond Lexus Ownership Solutions. Once you purchase a new Lexus, you'll become a member of the Lexus Encore Owner Benefits Program and enjoy a host of exclusive benefits.†

For further details, simply visit your nearest Lexus dealer or see www.lexus.com.au/owners/benefits

- The Guaranteed Future Value (GFV) is the minimum value of your new or approved demonstrator Lexus at the end of your finance contract, as determined by Lexus Financial Services (LFS). If you decide to return your car to Lexus at the end of your term, LFS will pay you the agreed GFV which will be put against your final payment, subject to fair wear and tear conditions and agreed kilometers being met.
- The information provided is general in nature. You should seek your own financial advice to determine whether Lexus Ownership Solutions is appropriate for your individual circumstances. Please speak with your Lexus Dealer for more information. Terms, conditions, fees and charges apply. Lexus Ownership Solutions GFV products are available to approved customers of Lexus Financial Services, a division of Toyota Finance Australia Limited ABN 48 002 435 181, AFSL and Australian Credit Licence 392536.
- ++ Lower monthly repayments compared to a similar term with no Guaranteed Future Value (GFV) or equivalent balloon final payment. Total interest charges will be higher if a GFV or balloon final payment is selected.
- [†] Encore and Encore Platinum Benefits apply on selected new and demonstrator vehicles for a 3 year period from the date Encore is first activated by the Dealership. Inclusions may change without notice. Subject to availability. For full T&Cs, details and eligible models, see your Lexus Dealer or lexus.com.au/encore.
- ** Approved applicants only. Terms and conditions apply. A deposit may be required for capacity reasons.
